Subject: West Waukesha Bypass Study
(I-94 to STH 59)
Waukesha County

Dear Property Owner/Resident:

We are excited to announce the start of the Waukesha West Bypass Study project. The Waukesha County Department of Public Works, in cooperation with the Wisconsin Department of Transportation, City of Waukesha, and other governmental and review agencies, is beginning a study of options for a west bypass around the City of Waukesha. The study covers about 4.5 miles, between I-94 on the north and State Highway 59 on the south. The scope of the project is to investigate alternatives to improve user safety, access, and mobility within the project corridor.

Waukesha County is obligated to fully investigate any and all alternatives, and their resulting environmental and social impacts, to determine if, and if so, where possible improvements should be designed and constructed. An Environmental Impact Statement and several public meetings will be conducted as part of this study. If you have any questions regarding this study, we encourage you to visit the project website at <http://www.waukeshabypass.org>.

Waukesha County has hired the consulting engineering company CH2M Hill to conduct the study, as well as assist us in surveying and gathering data along the study corridor. This work will begin in the near future and you may notice survey crews and study team members working along the study routes. Please do not assume that the location of the survey and study areas is ANY indication of where possible improvements will ultimately be constructed. At this time, the team is only gathering information to assist us in the study.

If you have any questions about the study or field work, please contact Gary Evans, of Waukesha County, at (262) 548-7740 or Mr. Charlie Webb, of CH2M Hill at (414) 847-0248.

Sincerely,

Allison Bussler, Director
Department of Public Works
