

Features of Pebble Creek Corridor Alternative

- This is the alignment included in city, county and regional plans since the 1970's
- Most direct route to Hwy 59
- No crossing of Pebble Creek is required
- Lowest construction cost
- Highest impact to primary environmental corridor
- 0 to 2 residential impacts
- Close to some residences on Hawthorne Hollow Drive
- Potential impacts to state threatened and endangered species (Butler's garter snake, Blandings turtle, long-eared sunfish)
- Wetland impacts vary from 6 to 19 acres of wetland
